

FIG. 1

FIG. 2 is a block diagram of a network architecture for a hotel, showing the connection between hotel rooms and external servers via a gateway device and the Internet.

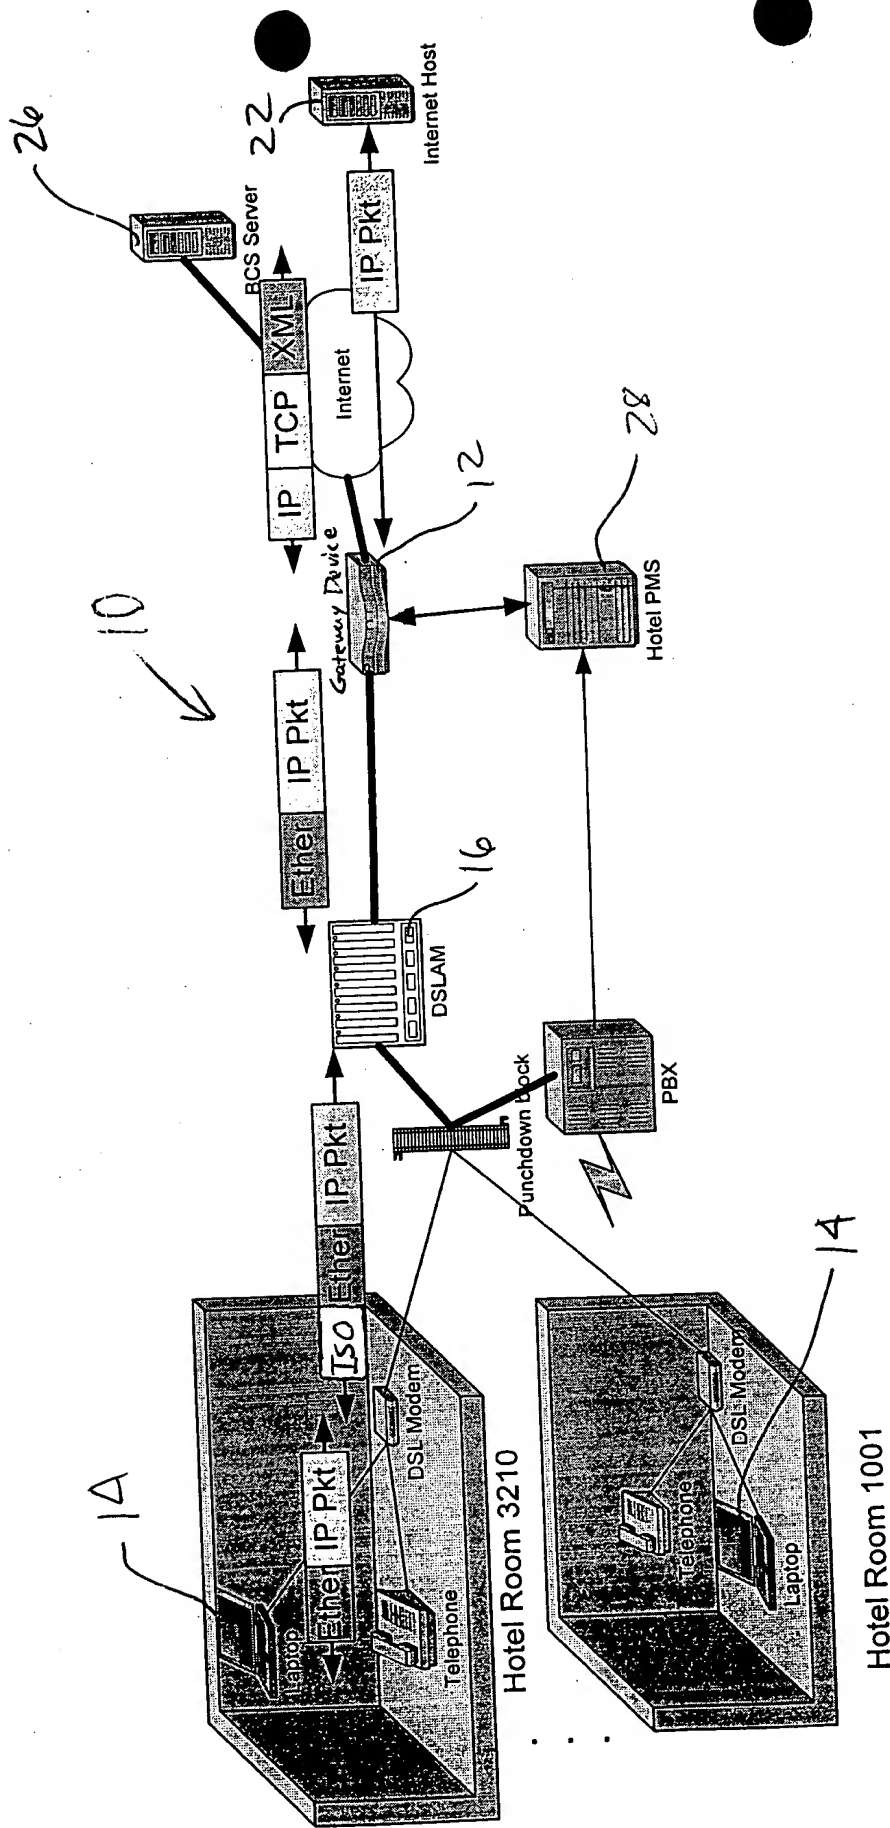

FIG. 2

FIG. 3 is a block diagram of a system architecture. The system includes an External Device (10) connected to an Internal Web Server (30). The Internal Web Server (30) is connected to a Parser Front End (34). The Parser Front End (34) is connected to a Parsing Section (36) and a Building Section (44). The Parsing Section (36) is connected to an AAA API "Wrapper" (38). The AAA API "Wrapper" (38) is connected to an AAA (BCS) API (40). The AAA (BCS) API (40) is connected to an AAA (42).
